

WALL OF FOAM

Attract new customers and increase profits by adding the Coleman Hanna Wall of Foam Arch!

The Coleman Hanna Carwash Systems **Wall of Foam** Arch is a versatile multi-use foam curtain applicator. It can be used to apply foam conditioners for cleaning, foaming polish for shine and protection or a water fall arch for sealing or rinsing.

When used as a foaming arch it utilizes three separate foam generators that adjust the amounts of chemical, water, and air to get the desired foam wetness and the consistency you want. The arch can come with custom graphics that are tailored to your car wash allowing you to promote your brand, a specific use, or a new car wash package.

The Coleman Hanna **Wall of Foam** can be mounted on an existing Versa Arch or can be mounted on the new Horizon arches.

RAIN OF FOAM

3 Foam Generators;
H816034;

(You will need a qty of 3 for each Rain of Foam Manifold)
